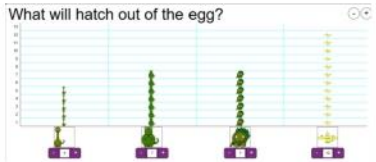
Spring Term Computing

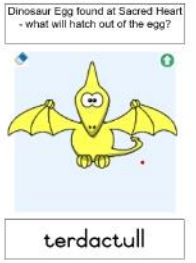
Reception -Data Handling

Y3 used 2count to create a pictogram showing what type of dinosaur might hatch out our class dinosaur egg.



Reception - Publishing

The children used 2publish to add a picture and label the dinosaur they thought would hatch from the egg.

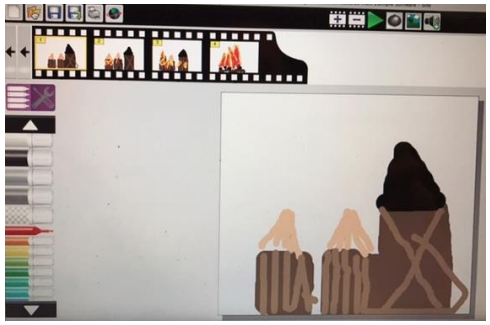


Year One - Coding

Year 1 have been working with Mr Connelly to manipulate objects to move in certain directions. They learnt to detect move a bubble around the screen and then pop it.

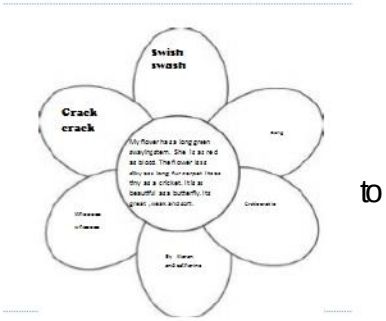
Year Two - Animation

Year 2 researched the Fire of London and produced an animation to show how the fire spread along Pudding Lane.



Year Three - Publishing

We used Publisher to create our own shape poems .We used the internet to find a template .We learned how to change the size of the template and how add text boxes.



to

Year Four - Publishing

Year Four used PowerPoint to create exciting advertisements. They copied and pasted images from the internet. They change the font size and colour and they learnt how to include shapes and colour them in.

Year Five - Publishing

Year Five created some newspaper articles based on the mysterious UFO sightings that they had been writing about. They used Microsoft Publisher and write in columns, they also added a bold title, added images and included photo captions.

Year Six - Internet Research

On World of Work Day, year 6 were visited by 2 very special visitors from Wigan council. They came to share information on the types of jobs which the children could aspire for. They used an online game simulation where the children could walk down the street and learn about the different jobs.
