

Celebrating our rich and diverse curriculum

World of Work Day

23rd March 2017

Thank you to all our visitors who came to talk to us about the world of work including: Science, innovation, construction, oil and gas, drainage, baking, art, distribution, media and Government. Phil taught us that making mistakes is an important part of learning and innovation. Alison has to go to work in the night if she is on call. Andrew's job can be dangerous. If he hits gas, he can get his mask on in under 5 seconds. Everyone was invited to come dressed in work wear.

Can you guess the jobs in our photographs?
