Reception used the programme 2publish. They had to use the typing tools and predict which dinosaur would hatch from the egg that they found.

They also used the image button to add a picture of their chosen dinosaur.

Year One used the programme 2animate.

They learnt how to use the different pen tools to add textures to their images. They used the keys on the keyboard to type their stories and included capital letters and full stops.

Year Two used the 2publish software to create an information page all about Lent. They learnt how to change the style and size of the writing and they worked together to choose appropriate images for their fact sheet.
